Guide to Manual Unifi Setup on Windows 7

Step one
Select the Wi-fi from the bottom right hand corner of the screen.

Step two
In the Connection panel select “Open Network and Sharing Center”.

Step three
In the Network and Sharing Center select ‘Manage Wireless Networks’.

Step four
In Manage Wireless Networks select ‘Add’.

Step five
Select ‘Manually create network profile’.

Guide to Manual Unifi Setup on Windows 7

Step six
Enter the following information:

Network name: ‘Unifi’
Note: it is essential that the “U” is capitalized.
Security type: ‘WPA2-Enterprise’

Click “Next”.

Step seven
Select ‘Change connection settings’.

Successfully added Unifi

Guide to Manual Unifi Setup on Windows 7

Step nine
Un-check the box for ‘Validate server certificate’.

Step ten
Click ‘Advanced Settings’ (from Step Eight).

Check the ‘Specify authentication mode’ box. In the drop down menu chose ‘User authentication’.

Step eleven
Click on the pop-up requesting ‘Additional information’, which will appear in the lower right hand corner of the screen.

Un-check the box for Automatically using your Windows credentials.

Click ‘OK’.

Step twelve
You will be prompted for your Unifi credentials.

- The ‘username’ is your UWA Person ID (e.g. 12345678).
- The ‘password’ is your Pheme password.

You are done!
After a few seconds you should be notified that the connection was established successfully. You now have Internet access.

Doesn’t work?
Help is available! But before coming for help, please try the following:

- Double-check your student number and Pheme password are correct and have not expired.
- Move around to ensure you are in a location with good wireless reception.
- Ensure that you have the latest drivers installed for your wireless network card.

If it still doesn’t work, contact Information Services.

In person: At an inquiry desk in one of the UWA subject libraries
