Step one
*NOTE:* You must have installed **Windows Vista Service Pack 1** or later before continuing; Unifi will not work on earlier versions of Windows Vista.

Under the Start menu, select ‘**Connect to**’. Select the ‘**Unifi**’ network.

---

Step two
Enter the following details:

- **Username:** Your UWA student number
- **Password:** Your Pheme password.

Then press ‘**OK**’.

---

Step three
Select ‘**Enter/select additional log on information**’. A window will appear saying ‘**Validate Server Certificate**’. Press ‘**OK**’.

---

You are done!
After a few seconds you should be notified that the connection was established successfully. You now have Internet access.

Doesn’t work?
Try the following tips:

- Double-check your student number and Pheme password are correct and have not expired.
- Move around to ensure you are in a location with good wireless reception.
- Ensure that you have Windows Vista Service Pack 1 installed. Unifi will not work without Service Pack 1 installed.

Still doesn’t work? Help is available!
