Guide to Manual Unifi Setup on Windows 8

Step one
Open File Explorer by moving your mouse to the top right hand corner of screen and selecting Search from the menu that appears.

Step two
From the Network and Sharing Center select “Set up a new connection or network”.

Step three
When prompted to Choose a connection option, select ‘Manually connect to a wireless network’ and then click ‘Next’.

Step four
Enter the following settings:

Network name: ‘Unifi’
Security Type: ‘WPA2-Enterprise’

Click ‘Next’.

Step five
After successfully adding Unifi select ‘Change connection settings’.

More information: www.unifi.uwa.edu.au
Guide to Manual Unifi Setup on Windows 8

Step six
In the **Unifi Wireless Network Properties** select the **‘Security’** tab.

Step seven
Where prompted for a **network authentication method** select **‘Microsoft: Protected EAP (PEAP)’**.

Click ‘**Settings**’.

Step eight
Uncheck the **‘Verify the server’s identity by validating the certificate’** box.

Click ‘**Configure…**’

Uncheck the **Automatically use my Windows credentials** box.
Click ‘**OK**’ and then ‘**OK**’ again.

Guide to Manual Unifi Setup on Windows 8

Step nine
In the Security tab (picture in step six) click ‘Advanced Settings’.

In Advanced settings, check the ‘Specify authentication mode’ box and choose ‘User authentication’ from the drop down.

NOTE: If there is no network icon in the system tray, it may be hidden within the 'less frequently used items' area, which can be expanded by selecting the 'up-arrow', typically on the left-most edge of the system tray.

Click ‘OK’ and then ‘OK’ again.

Step ten
From the ‘system tray’ in the lower right corner of your screen, click the ‘wireless network icon’ pictured below.

Select this icon to open the list of available wireless networks in range of the device.

Step eleven
From the list of available networks, select ‘Unifi’ and press the ‘Connect’ button that appears after selecting it.

Step twelve
The connection process will begin and you should be prompted to enter user credentials at the prompt:

More information: www.unifi.uwa.edu.au
Guide to Manual Unifi Setup on Windows 8

- The ‘username’ is your UWA Person ID (e.g. 12345678).
- The ‘password’ is your associated Pheme password.

Once you have entered your credentials, please press ‘OK’.

**Step thirteen**
The following prompt will appear:

This is normal. Simply press ‘Connect’ to proceed.

**You are done!**
After a few seconds you should be notified that the connection was established successfully as pictured.

**Doesn’t work?**
Help is available! But before coming for help, please try the following:

- Double-check your student number and Pheme password are correct and have not expired.
- Move around to ensure you are in a location with good wireless reception.
- Ensure that you have the latest drivers installed for your wireless network card.

If it still doesn’t work, contact Information Services.

In person: At an inquiry desk in one of the UWA subject libraries
