Step one
Open the AirPort menu and from the list of wireless networks available. Select 'UnifiGuest'.

**NOTE:** Ensure the AirPort is turned on first.

After a few moments your Mac will be connected to the UnifiGuest access point (this is denoted by a tick).

Step two
Once connected, open your preferred web browser (e.g. Safari, Firefox) and you will be presented with the 'Welcome to UnifiGuest' login page.

**NOTE:** Your username is the e-mail address which your UnifiGuest password was sent to.

You will see the above authentication message appear briefly and then your browser will be redirected to whatever website it attempts to reach by default.
