

UniDrive on Linux

Step one

From the top right hand corner click 'Activities'.

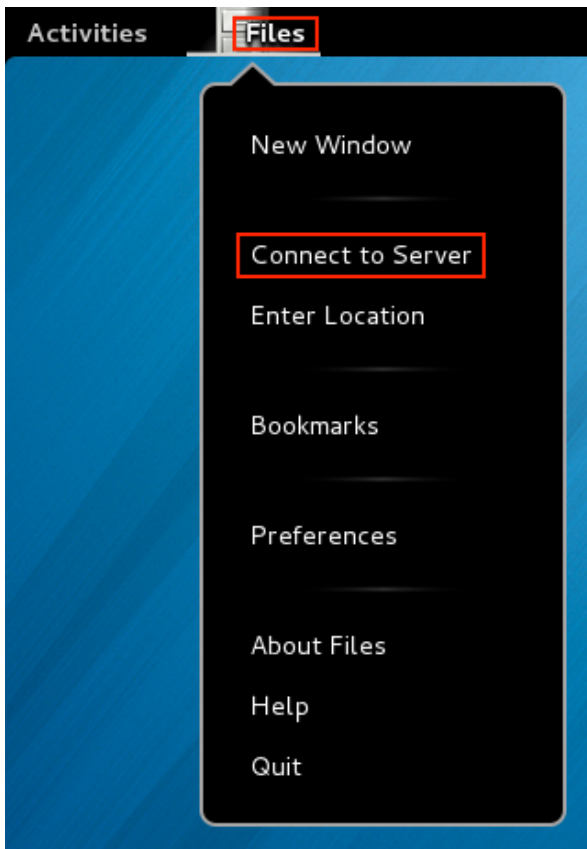

Then select the 'Files' icon from the Activities bar.

Step two

From the top right click on 'Files' and then select 'Connect to Server'.

Step three

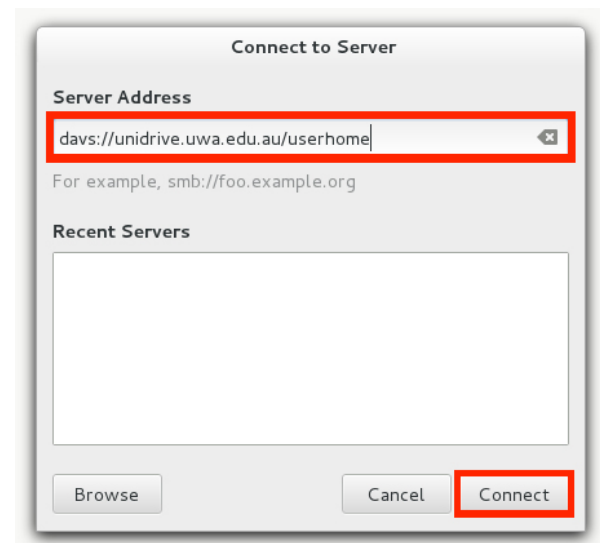

In the 'Server Address' field, enter the address of the server you wish to connect to:

For your **Student Network Folder** use:

❖ `davs://unidrive.uwa.edu.au/userhome`

For access to other shared folders use:

❖ `davs://unidrive.uwa.edu.au/data`

Step four

Enter your credentials.

NOTE: The **Username** is your **student number** (i.e. 12345678) and the **Password** is your **Pheme password**.

UniDrive on Linux

If you are using a personal computer, make sure the **'Remember forever'** option is checked.

NOTE: This means that you (or anyone else using this device) will be able to access the contents of this folder without entering a password.

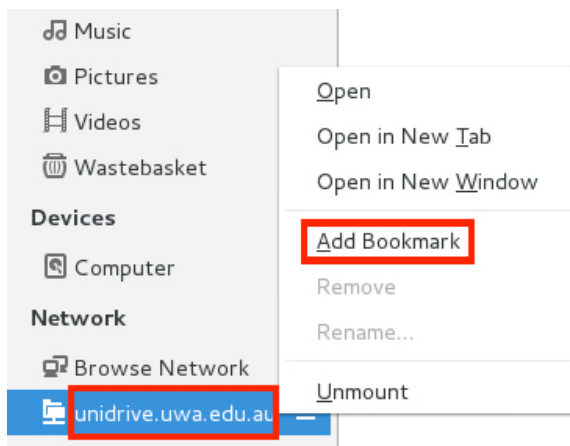

If you are NOT using a personal computer, make sure the **'Remember password until you logout'** option is checked.

Click **'Connect'**.

Step five

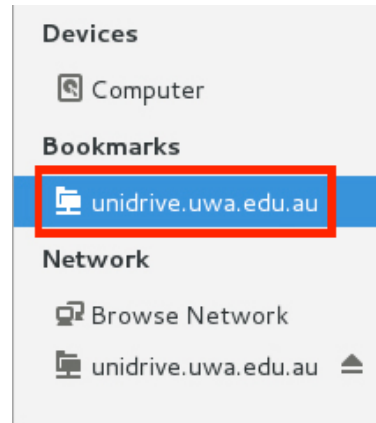

The **UniDrive** folder will now be connected and open. It will be shown under the **Network**.

To bookmark **UniDrive** for later use, right click on **'unidrive.uwa.edu.au'** and select **'Add Bookmark'**.

You are done!

UniDrive should now be available in **Files** under **Bookmarks**.

Doesn't work?

Try the following tips:

- Double-check your student number and PHEME password are correct and have not expired.
- Double-check you are correctly enrolled in at least one unit this semester

Still doesn't work? Help is available!
