Step one
Click on the Network Manager icon and select and connect to ‘Unifi’ from the list of networks.

Step two
Enter the following details:

- **Wireless security:** WPA & WPA 2 Enterprise
- **Authentication:** Protected EAP (PEAP)
- **Inner Authentication:** MSCHAPv2
- **Username:** Your UWA student number
- **Password:** Your Pheme password

Then press ‘Connect’.

Step three
Press ‘Ignore’.
You are done!

After a few seconds you should be notified that the connection was established successfully. You now have Internet access.

 Doesn’t work?

Try the following tips:

- Double-check your student number and Pheme password are correct and have not expired.
- Move around to ensure you are in a location with good wireless reception.
- Ensure that your wireless card is supported on Linux and that you have the latest drivers installed for your card. Unfortunately some wireless network cards will simply not work on our network with Linux.

Still doesn’t work? Help is available!
