

## Importing publications from a file

It is **not** possible to import RIS files which contain PDF links. You will be required to remove the links before uploading the file to the Repository. Please note, this only applies to RIS files. You can upload BibTex files that contain PDF links to the Repository in the usual way. For instructions on how to remove PDF links in RIS files, please follow the instructions below.

Before exporting the file from EndNote, please ensure you remove the PDF attachment from the reference record (see highlighted PDF attachment – to be removed – below).

EndNote X8 - [Chisholm, 2015 #55]

**Abstract**  
Although now believed to be two distinct disorders, autism spectrum disorders (ASD) and schizophrenia spectrum disorders (SSD) share multiple phenotypic similarities and risk factors, and have been reported to co-occur at elevated rates. In this narrative review, we give a brief overview of the phenomenological, genetic, environmental, and imaging evidence for the overlap between ASD and SSD, highlighting similarities and areas of distinction. We examine eight possible alternate models of explanation for the association and comorbidity between the disorders, and set out a research agenda to test these models. Understanding how and why these disorders co-occur has important implications for diagnosis, treatment, and prognosis, as well as for developing fundamental aetiological models of the disorders. Once the PDF attachments and/or links have been removed from the references, you can begin uploading publication details from a file by following the instructions below.

1. Login to the UWA Research Repository using your staff number and PHEME password.
2. Click the green 'Add new' button.
3. Click 'Research output' > 'Import from file' from the left-hand menu on the 'Choose submission' page.

4. Select the file format from the options available (i.e. BibTeX, RIS or CERIF).
5. There are two options for importing your publications from a file:
  - Option one: Pasting the text;
  - Option two: Uploading the file from your computer

#### Option One: Pasting the text

- Copy and paste the text from the file into the 'Paste text' field:

- Click 'Import'. A list of publications will appear in the search results.
- Skip to step 6.

The screenshot shows a web interface titled "Choose submission". On the left is a navigation sidebar with categories like "Submission guide", "Research output", "Activity", "Prize", "Press / Media", "Application", "Award", "Project", "Impact", "Dataset", "Student thesis", and "Curriculum Vitae". The "Research output" section is active, with sub-options: "Create from template", "Import from online source", and "Import from file".

The main content area is titled "BibTeX" and "Import from BibTeX". It features a "Paste text" input field with an "Import" button below it. Below this is an "Upload file" section with a dashed box containing a cloud icon and the text "Drag file or browse your computer.", followed by another "Import" button.

Below the upload section, it shows "380 results" and a list of search results. Each result includes a title, author/year, journal information, and a "Type" (e.g., "Article"). Each result has an "Import" button with a green checkmark and a "Remove" button.

- Seminars in speech and language (Online)**, 1983. SEM. SPEECH. Article. Import Remove
- Texture- modified foods and thickened fluids as used for individuals with dysphagia: Australian standardised labels and definitions**, 2007, vol. 64, p. 553-576. Nutrition & Dietetics DOI. Article. Import Remove
- Predicting Language Outcomes at 4 Years of Age: Findings From Early Language in Victoria Study**, 2011, vol. 127, issue 2, p. peds.2010-0254d-peds.2010-0254d. PEDIATRICS DOI. Article. Import Remove
- 2015 Other. Import Remove

### Option Two: Uploading the file

- Click on 'Drag file or browse your computer' to upload the file from your computer.

This is a close-up of the "Upload file" section from the previous screenshot. It shows a dashed rectangular box with a cloud icon and an upward arrow. To the right of the icon is the text "Drag file or browse your computer.". Below the dashed box is a grey "Import" button.

- Locate the file from your computer and click 'Open'.
  - A list of publications will appear in the search results.
6. For each publication record in the search results, click the 'Import' button (or 'Remove' button if there is a notification alerting you that it is a potential duplicate. You may need to double check that it is, in fact, a duplicate before removing the record).

The screenshot shows a web interface titled "Choose submission". On the left is a navigation sidebar with categories like "Submission guide", "Research output", "Activity", "Prize", "Press / Media", "Application", "Award", "Project", "Impact", "Dataset", "Student thesis", and "Curriculum Vitae". The "Research output" category is selected. The main content area is titled "BibTeX" and contains an "Import from BibTeX" section with a "Paste text" input field and an "Import" button. Below this is an "Upload file" section with a dashed box for dragging a file and a "browse your computer" link, also with an "Import" button. The search results section shows "380 results" and lists three articles, each with an "Import" button and a "Remove" button:

- Seminars in speech and language (Online)**, 1983. SEM. SPEECH. Article. [Import](#) [Remove](#)
- Texture- modified foods and thickened fluids as used for individuals with dysphagia: Australian standardised labels and definitions**, 2007, vol. 64, p. S53-S76. Nutrition & Dietetics DOI. Article. [Import](#) [Remove](#)
- Predicting Language Outcomes at 4 Years of Age: Findings From Early Language in Victoria Study**, 2011, vol. 127, issue 2, p. peds.2010-0254d-peds.2010-0254d. PEDIATRICS DOI. Article. [Import](#) [Remove](#)

At the bottom, there is a "2015 Other" entry with an "Import" button and a "Remove" button.

7. Check that the Author and affiliation details are correct (you can also edit this information in the next step), and click the 'Import & review' button at the bottom of the page.

Import & review Cancel

8. Check that all mandatory fields marked with a red asterisk are complete. The 'Managing organisational unit' can be allocated to the first UWA Author's affiliation.
9. Click 'Save' at the bottom of the research output record. The publication metadata will then become visible in the Repository once it has been processed.
