NOTE: Java must be installed on your system before proceeding with this setup. If you don’t have Java installed, it can be obtained from www.java.com

Step one
Open Internet Explorer and go to the URL: http://uniconnect.uwa.edu.au

Step two
Agree to the Terms and Conditions and enter the following:

- **Username:** Your UWA Person ID (i.e. your student or staff number)
- **Password:** Your Pheme password

Then press 'Sign In'.

You will be presented with the following ActiveX installation screen:

NOTE: You may get several User Account Control warnings similar to the example below:

You must select 'Yes' for all these prompts, otherwise the Network Connect software will not install correctly.

Step three
Windows will prompt you if you wish to proceed with the Network Connect installation.

Select 'Install'.

Step four
You will then be presented with the Setup – Control Warning screen, please select 'Always'.

The setup process will now commence, installing the Network Connect software

Uni|onnect guide for Windows Internet Explorer 8 which will manage your Uniconnect connection.

Connected!
After a few moments the Network Connect software should have installed and established a connection. You should see a new icon in your system tray that looks like the following yellow padlock:

To disconnect
To disconnect, simply right-click on the padlock icon and select ‘Sign Out’.

To connect
Once the software is installed, you can connect and disconnect via the Network Connect application, located in the Start Menu.

Doesn’t work?
Help is available! But before coming for help, please try the following:

- Double-check your student number and Pheme password are correct and have not expired.
- Ensure Java is installed as described at the beginning of this guide.

Still doesn’t work? Help is available!
