

## UniDrive on Android

**NOTE:** WebDAV Navigator Lite is used for the purposes of this guide, students are welcome to use any WebDAV client.

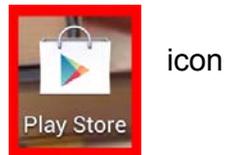

### Steps in this guide

1. Downloading a WebDAV Client from the Google Play Store
2. Connecting to your Networked Folder

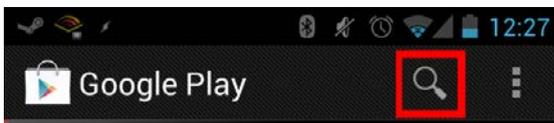

### Step one

You will need to download a free program called 'WebDAV Navigator Lite' from the **Google Play Store** to access your Networked Folder.

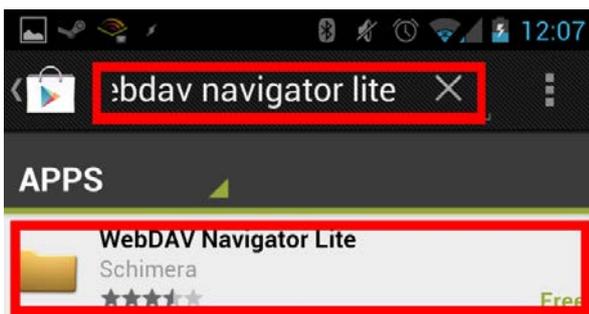

Launch the **Google Play Store** by tapping on the icon on the **Homescreen**.

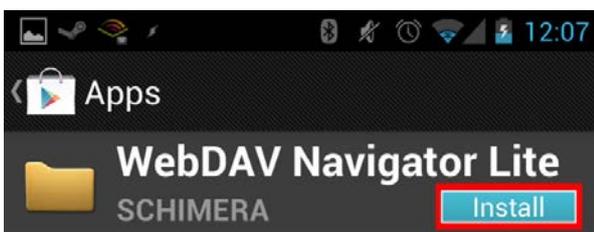

Tap on the **magnifying glass symbol** in the top right to search.

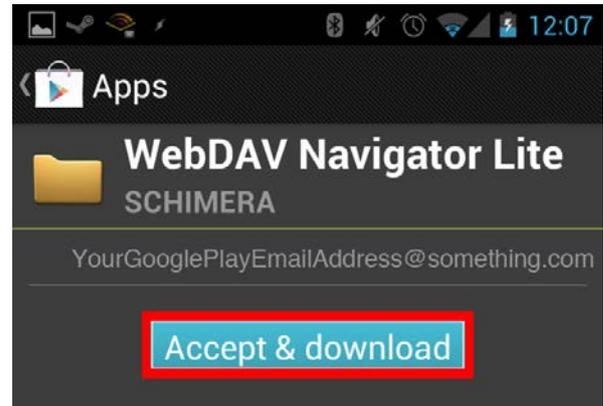

Type in '**WebDAV Navigator Lite**' and tap the app from the search list.

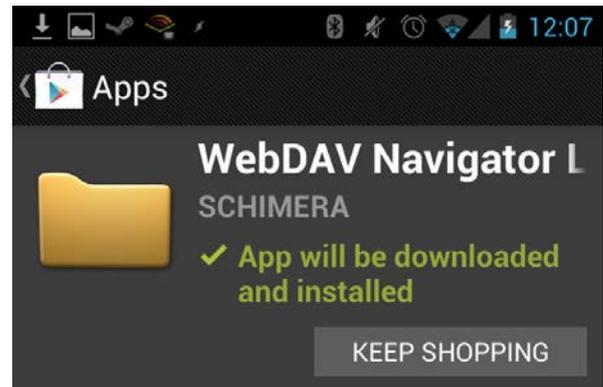

Tap the '**Install**' button at the top right of the screen.

Choose '**Accept & download**'.

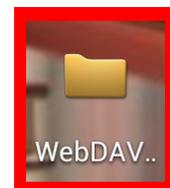

You will then see the '**download and installation**' prompt.

Return to the **Homescreen** by selecting the **Menu** button.

### Step two

Open **WebDAV Navigator Lite** by tapping app's icon.

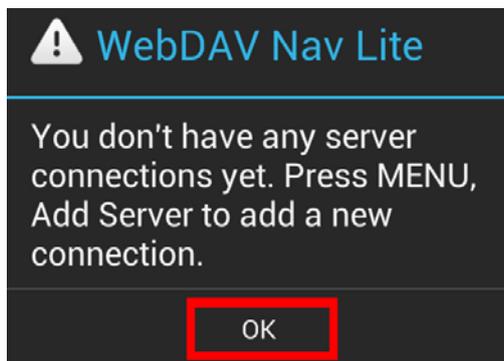

**NOTE:** You may need to swipe across to another screen to see the icon.

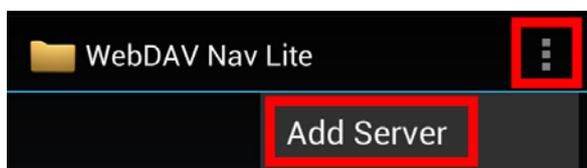

## UniDrive on Android

At the server prompt press 'OK'.

Tap on the **three vertical dots** in the top right corner of the screen and select 'Add Server'.

In the 'Name' field enter 'UniDrive'

In the 'Server URL' field enter the URL of the server you wish to connect to:

For your **Student Network Folder** use:  
❖ <https://unidrive.uwa.edu.au/userhome>

For access to other shared folders use:  
❖ <https://unidrive.uwa.edu.au/data>

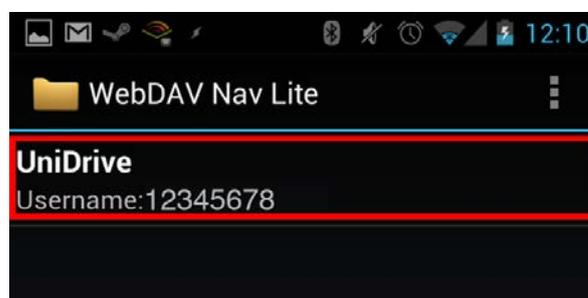

Enter your credentials.

**NOTE:** The **Username** is your student number (eg. 12345678) and the **Password** is your **PHEME** password.

Choose the save icon in the top right corner

## You are done!

You can now access your **Network Folder** by opening **WebDAV Navigator Lite** and choosing 'UniDrive' from the list.

## Doesn't work?

Try the following tips:

- Double-check your student number and PHEME password are correct and have not expired.
- Double-check you are correctly enrolled in at least one unit this semester

Still doesn't work? Help is available!
