

Add ARC/NHMRC grant details

The ARC and NHMRC require publications arising from their funding to be made openly accessible in an institutional repository within a 12 month period post-publication. Providing the ARC and/or NHMRC grant details allows the Library to assist you with complying with the requirements of these funders.

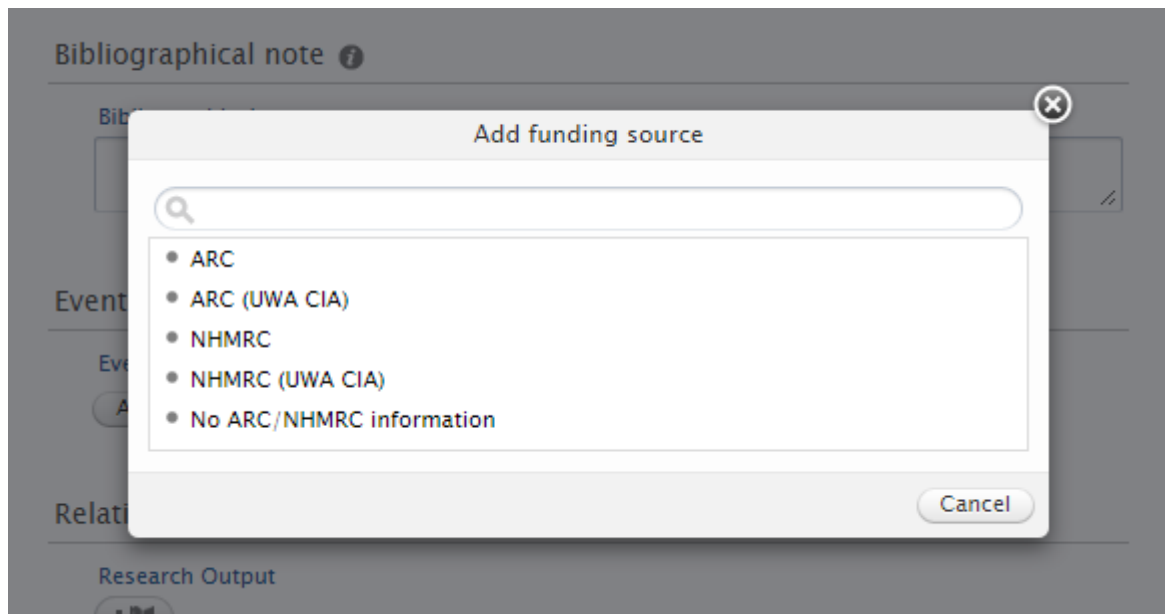

1. Log in to UWA Research Repository using your staff number and PHEME password.
2. Click on 'Research output' on the left hand side, then click 'Editable'.

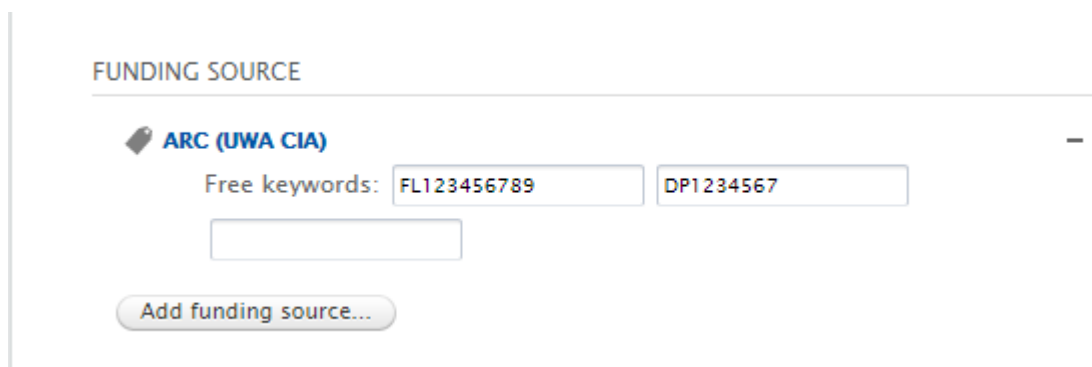

3. Click on the publication title that requires the NHMRC or ARC grant and funder details to be added. The research output record will then appear in a pop-up window.
4. On the research output record, scroll down and click on 'Add funding source'.

5. Select the appropriate funding source from the list of available options.
 - 'ARC (UWA CIA)' and 'NHMRC (UWA CIA)' indicates that there is a UWA Chief Investigator on the grant. If there is a UWA Chief Investigator on the grant, please select either of these options.

6. Once the funder details have been selected, add the grant ID/s in the 'Free keywords' field.

7. Click 'Save' at the bottom of the page.
