Step one
From the ‘system tray’ in the lower right corner of your screen, click the ‘wireless network icon’ pictured below.

**NOTE:** If there is no network icon in the system tray, it may be hidden within the ‘less frequently used items’ area, which can be expanded by selecting the ‘up-arrow’, typically on the left-most edge of the system tray.

Step two
From the list of available networks, select ‘Unifi’ and press the ‘Connect’ button that appears after selecting it.

Step three
The connection process will begin and you should be prompted to enter user credentials at the ‘Network Authentication’ prompt:

- The ‘username’ is your UWA Person ID (e.g. 12345678).
- The ‘password’ is your associated Pheme password.

Once your have entered your credentials, please press ‘OK’.

More information: www.unifi.uwa.edu.au
Step four
The following prompt will appear:

This is normal. Simply press ‘Connect’ to proceed.

You are done!
After a few seconds you should be notified that the connection was established successfully as pictured below.

You now have Internet access.

Doesn’t work?
Help is available! But before coming for help, please try the following:

- Double-check your student number and Pheme password are correct and have not expired.
- Move around to ensure you are in a location with good wireless reception.
- Ensure that you have the latest drivers installed for your wireless network card.

If it still doesn’t work, contact Information Services.

In person: At the information desk in your subject library
