

*NOTE:* WebDAV Navigator is used for the purposes of this guide. Students are welcome to use any WebDAV client.

## Step one

Open your WebDAV compatible mobile client. If you don't have one installed, you will need to download one from the App store first.

## Step two

Add a new server to your WebDAV client. This will allow you to enter the following details to access UniDrive on your iOS device.

Enter the following settings:

**Name:** UniDrive

**Server URL:**

<https://unidrive.uwa.edu.au/userhome>

*NOTE:* For access to shared folders in UniDrive, enter

<https://unidrive.uwa.edu.au/data>

**Username:** Your student number, eg. 12345678

**Password:** Your PHEME password

Save these settings.

## You are done!

With these details you should now be able to access your Student Network Folder via your WebDAV client.

## Doesn't work?

Help is available! But before coming for help, please try the following:

- Double-check your student number and PHEME password are correct and your password has not expired

If it still doesn't work, contact the University Library.

In person: At the information desk in your subject library
