Unifi on Mac OS X 10.6 Guide

Step one
Click on the Airport icon in the system menu. Select and connect to “Unifi”.

---

Step two
Enter the following details:
- **Username**: Your UWA student number
- **Password**: Your Pheme password
- Ensure that the 802.1X field is set to “Automatic”

Then press “OK”.

---

Step three
You will be asked to verify the certificate. Press “Show Certificate”.

![Certificate Verification](image)

Click on the right-arrow next to “Trust”. Change the “When using this certificate” field to “Always Trust”. Press “Continue”.

---

You may be asked to enter your username and password to change the Trust settings. This is asking for the username and password for your computer.

You are done!
After a few seconds you should be notified that the connection was established successfully. You now have Internet access.

Unifi on Mac OS X 10.6 Guide

Doesn’t work?
Try the following tips:

- Double-check your student number and Pheme password are correct and have not expired.
- Move around to ensure you are in a location with good wireless reception.

Still doesn’t work? Help is available!
