Uniconnect on Android

Step one
From the home screen, you will need to go to the Market.

Step two
Search the Market store for the App entitled: “Junos Pulse”. Download and install it.

Step three
Once the App has downloaded and installed, open it:

Review and Accept the End User License Agreement.

Step four
Once Junos Pulse is open, select “Connections”:

On the following screen, select “Add Connection”.

Step five
Set the following options to:

Name: Uniconnect
URL: [https://uniconnect.uwa.edu.au](https://uniconnect.uwa.edu.au)

Once these options are entered, select “Create Connection”.

Step six
Return to the previous screen and you should see ‘Uniconnect’ on the VPN list:

Press the “Connect” button.

**Uniconnect on Android**

You should now be prompted to enter your credentials as follows:

- **Username**: Your UWA Person ID (i.e., your 8 digit student or staff number)
- **Password**: Your Pheme password

When ready, press “Sign In”.

**NOTE**: After entering your details, you will need to review and select “I Agree, Proceed”.

**Connected!**

After a few moments you will be presented with the following screen, which means you are successfully connected via Uniconnect:

You can now leave the app and it will continue to maintain a connection until you disconnect it.

---

**To disconnect/reconnect**

To connect or disconnect Uniconnect, simply open the Junos Pulse app and press the **connect/disconnect button**.

**Doesn’t work?**

Help is available! But before coming for help, please try the following:

- Double-check your UWA person ID and Pheme password are correct and have not expired.
